

LAPP Australia would like to **congratulate the entire AUSSEF team** on their success on the global stage.

LAPP is proud to support the future of STEM in Australia, and the next generation of innovators and leaders.

## About LAPP Australia

LAPP has the widest range of cables and connectors, with more than 5,000 product lines stocked locally in Australia, and access to 40,000 directly from Germany.

These products – and complementary industrial automation ranges – are used by demanding industries including food and beverage, manufacturing, mining, oil and gas, water and

wastewater, building and construction, agriculture, data centres, green energy, intralogistics, and more.

Our dedicated Harnessing Solutions division provides cable assemblies to assist with fast installation, total traceability, quality assurance, and Standards compliance.
